

IMPORTANT NOTIFICATION: Labeling and packaging updates for ALBUTEIN

Grifols is dedicated to ensuring that healthcare professionals, pharmacies, and distributors have the information to manage the ALBUTEIN portfolio safely and effectively. As part of our ongoing commitment to improving product identification and accessibility, we have updated the labeling and packaging of ALBUTEIN vials and ALBUTEIN FlexBags®.

This communication provides a detailed overview of these changes, including a side-by-side comparison of the old and new color schemes, essential clarifications regarding accessibility, and the timeline for the transition to the new packaging.

KEY UPDATES TO ALBUTEIN LABELS

1 Updated concentration and strength color schemes

Concentration colors:

- All **5%** vial and FlexBag presentations will continue to be represented by gray
- All **25%** vial and FlexBag presentations, previously represented by red, will now be orange

Strength colors:

- Each strength within the 5% and 25% concentrations will now have a distinct color code to improve clarity. The previous labeling did not include specific colors to identify strength

2 Comparison of previous vs. updated colors for the 5% concentration of vials and FlexBags

- The table below outlines the concentration and new strength colors for each ALBUTEIN presentation:

Product presentation 5%	Previous concentration color	New concentration color	New strength colors
ALBUTEIN 5% 2.5 g / 50 mL	5%	5%	2.5 g / 50 mL
ALBUTEIN 5% 12.5 g / 250 mL	5%	5%	12.5 g / 250 mL
ALBUTEIN 5% 25 g / 500 mL	5%	5%	25 g / 500 mL
ALBUTEIN FlexBag 5% 5 g / 100 mL	5%	5%	5 g / 100 mL
ALBUTEIN FlexBag 5% 12.5 g / 250 mL	5%	5%	12.5 g / 250 mL
ALBUTEIN 5% 25 g / 500 mL	5%	5%	25 g / 500 mL

3 Comparison of previous vs. updated colors for the 25% concentration of vials and FlexBags

- The table below outlines the concentration and new strength colors for each ALBUTEIN presentation:

Product presentation 25%	Previous concentration color	New concentration color	New strength colors
ALBUTEIN 25% 5 g / 20 mL	25%	25%	5 g / 20 mL
ALBUTEIN 25% 12.5 g / 50 mL	25%	25%	12.5 g / 50 mL
ALBUTEIN 25% 25 g / 100 mL	25%	25%	25 g / 100 mL
ALBUTEIN FlexBag 25% 12.5 g / 50 mL	25%	25%	12.5 g / 50 mL
ALBUTEIN FlexBag 25% 25 g / 100 mL	25%	25%	25 g / 100 mL

4 Accessibility considerations for individuals with color vision deficiency (CVD)

- To support users with CVD, the new labels prominently display text-based strength identifiers in addition to the color coding
- We recommend always confirming the concentration and fill size presented on the label

5 Transition timeline from previous labels

- The last lot of ALBUTEIN packaged with the previous labeling will expire as follows:
 - ALBUTEIN 5% vial:** January 31, 2027
 - ALBUTEIN 25% vial:** March 1, 2027
 - ALBUTEIN FlexBag 5%:** July 24, 2025
 - ALBUTEIN FlexBag 25%:** July 24, 2025
- Please refer to the expiration date printed on the carton for each package size. You may encounter both old and new packaging in the field until this date
